## TRANSPORTATION Specialist High Skills Major

A Specialist High Skills Major is a ministry approved specialized program that allows students to focus their learning on a specific economic sector, Transportation while meeting the requirements for the Ontario Secondary School Diploma. This program assists in their transition from secondary school to apprenticeship training, college, university, or the workplace. An SHSM enables students to gain sector-specific skills and knowledge in the context of engaging, career-related learning environments and helps them focus on graduation and on pursuing their postsecondary goals.

The SHSM–Transportation enables students to build a foundation of sector-focused knowledge and skills before graduating and entering apprenticeship training, college, university, or an entry-level position in the workplace. The SHSM–Transportation provides students with a strong foundation for a wide variety of careers in the transportation sector, from those focusing on the service, repair, and modification of vehicles and vehicle systems to those related to the organization and management of transportation services and mass-transit systems. Depending on local circumstances, this SHSM may be designed to have a particular focus.

### What do the students who successfully complete the Specialist High Skills Major Program receive?

- An Ontario Secondary Diploma with an embossed SHSM red seal
- An SHSM Record documenting their achievement
- Formal recognition on their Ontario Student Transcript
- Industry recognized certifications

SHSM Certifications provide students with an advantage when entering the workforce, regardless of their chosen career.

## 'Reach Ahead' Experiences

Students pursuing an SHSM must have opportunities for Reach Ahead experiences connected with their postsecondary plans.

### What are Reach Ahead experiences?

Reach Ahead experiences are learning experiences connected with the student's postsecondary pathway in the Transportation sector.

Reach Ahead experiences can range from visiting a college to investigate the program a student is considering, to sitting in on university classes in a student's field of interest, interviewing an employee in the field of work the SHSM student is considering, to discussing the postsecondary education, training and experiences of someone in the Transportation sector.

---

## Experiential Learning

Experiential learning and career exploration activities give students opportunities to explore, observe, participate in, and reflect on a variety of sector-specific experiences and careers. These activities also enable students enrolled in the SHSM to find out about the opportunities available in careers that interest them.

The SHSM experiential learning and career exploration requirement consists of planned learning activities that take place outside the traditional classroom setting. Experiential learning may take a variety of forms, including career exploration activities, job shadowing, job twinning, work experience or virtual work experience.
