# Instructions for Completing the Grade 9 Course Selections

## Compulsory Courses

Choose the five compulsory courses, one in each subject area (English, French, Geography, Mathematics, and Science) Course descriptions are in the DSBN Program & Course Calendar and in the Open House package.

## Choosing Arts Credits and Elective Credits

**Usually** students choose one Arts Credit **AND** one Elective Credit; however, students can choose two Arts Credits with permission. Indicate your second choice for each in case of a timetable conflict.

## Choosing Alternate Credits

Students are asked to choose one Arts Credit Alternate and one Elective Credit Alternate. These **MAY** replace one or both of the student's first choices depending on timetable conflicts. Guidance will look to the Alternates on a needs basis when the new timetable is complete in June

## Healthy Active Living Credit

Indicate Male or Female for your physical education credit. If you are planning on taking Healthy Active Living in Summer School, please note that the Summer School course and the Grade 9 course have different course codes and students **can** earn both credits. Either one will count toward their physical education compulsory credit.

## Westlane Hockey Academy

Westlane offers a specialized program, second semester, where students earn two physical education credits. This option would replace the PPL credit and the Elective credit. There is an extra cost associated with this option. Just like other electives, we offer this yearly, but whether it runs is dependent on student enrollment. If it does not run because of low enrollment, students would be placed into their Alternates according to Career Cruising (this is why Alternates are important).

## Completing the Process

For students coming from within DSBN, please submit to your Grade 8 teacher.

For students coming from outside of the DSBN, please submit directly to our Guidance Office.
